

Carbon Reduction Plan

Wessex Lifts Limited

Publication date: 23/09/2025

Commitment to achieving Net Zero

Wessex Lifts Limited is committed to achieving Net Zero emissions by 2050.

Baseline Emissions Footprint

Baseline emissions are a record of the greenhouse gases that have been produced in the past and were produced prior to the introduction of any strategies to reduce emissions. Baseline emissions are the reference point against which emissions reduction can be measured.

Baseline Year: 2025

Additional Details relating to the Baseline Emissions calculations.

Wessex Lifts has not previously assessed or reported its greenhouse gas emissions.

All scope categories (Scope 1, 2 and included Scope 3 sources) are estimated (speculative). These estimates will be verified in Q1 2026 by a third-party auditor.

The baseline year and current emissions are considered the same, since there are no earlier assessments.

Baseline year emissions:

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	120
Scope 2	20
Scope 3 (Included Sources)	200
Total Emissions	340

Current Emissions Reporting

Reporting Year: 2025-2026

EMISSIONS	TOTAL (tCO ₂ e)
Scope 1	120

Scope 2	20
Scope 3 (Included Sources)	200
Total Emissions	340

Progress against these targets will be reported by Q1 2026 as indicated above.

Carbon Reduction Projects

The following environmental management measures and projects have been completed or implemented since inception. The carbon emission reduction achieved by these schemes equates to circa. 100 tCO₂e, a 33% reduction against our initial calculations (not included against our baseline, as this has been an approximate calculation carried out in 2024). These measures will be in effect when performing the contract.

- Certification and ongoing auditing against ISO 14001, with our Environmental Champion, Production Manager Paul Wheadon, responsible for implementation of our Environmental Management System.
- Deployment of our INFOR Integrated ERP System to streamline operations, reduce duplication, and minimise paper usage.
- Implementation of Fleetmatics vehicle tracking across our vans to reduce emissions by optimising routes, limiting idling, and discouraging non-business journeys.
- Ongoing renewal of our fleet with more efficient vehicles, including the introduction of four electric vehicles, with further expansion planned.
- Enhanced on-site and office energy efficiency, such as use of LED lighting, equipment switch-off policies, and redesigned hydraulic lift components requiring less energy and fluid.
- Waste minimisation and recycling measures, including segregation of recyclable materials, reduction of packaging waste through collaboration with suppliers, and use of tablets for engineers to eliminate unnecessary paper.
- Reducing to one site by 2028, negating the need for energy consumption.
- Limiting outsourcing mid process to reduce vehicle usage on the roads.

Looking forward, we are committed to further reducing our emissions through:

- Replacing the remaining internal combustion engine fleet with hybrid or electric vehicles, subject to operational suitability.
- Appointment of a specialist external auditor to calculate our emissions with full accuracy, ensuring transparent reporting by Q1 2025.
- Formal alignment with recognised initiatives, including a planned commitment to the Science Based Targets initiative (SBTi), supporting our pathway to net zero.

Declaration and Sign Off

This Carbon Reduction Plan has been completed in accordance with PPN 06/21 and associated guidance and reporting standard for Carbon Reduction Plans.

Emissions have been reported and recorded in accordance with the published reporting standard for Carbon Reduction Plans and the GHG Reporting Protocol corporate standard¹ and uses the appropriate Government emission conversion factors for greenhouse gas company reporting².

Scope 1 and Scope 2 emissions have been reported in accordance with SECR requirements, and the required subset of Scope 3 emissions have been reported in accordance with the published reporting standard for Carbon Reduction Plans and the Corporate Value Chain (Scope 3) Standard³.

This Carbon Reduction Plan has been reviewed and signed off by the board of directors (or equivalent management body).

Signed on behalf of Wessex Lifts Limited:

A handwritten signature in black ink, appearing to read 'J. H. H.', is written over a faint, light blue circular stamp. The signature is fluid and cursive.
