

VACANCY

Stock & Materials Controller

We presently have a vacancy for a Stock & Materials Controller. Working as part of a team but able to work independently, the successful candidate must have advanced knowledge of ERP (or similar) software systems. Candidate must be able to communicate effectively with other departments, and suppliers, to ensure smooth co-ordination of stock control systems.

Tasks include:-

- Day to day management of inventory control
- Maintenance of all stock control systems, including lean manufacturing
- Investigate, monitor and control any shortages
- Run stock re-order reports and action appropriately
- Action any project work required
- Update and report monthly B.o.M. product costings
- Provide assistance with any operational needs within Materials Control

Starting date:- As soon as possible

Full Job Description available upon request.
